DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

I/ fig. 4

II/ fig. 5

III/ fig. 6.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Michael Smith on 04/05/05 a provisional election was made without traverse to prosecute the invention of species I, claims 1-2,5-6,9-10. Affirmation of this election must be made by applicant in replying to this Office action. Claims 3-4,7-8,11-12 have been withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

An action on the merits now follows.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 5-6,9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Parkin (USPN 5,951,528).

Parkin discloses a hub an elongated needle having a first inner diameter larger than a second inner diameter, a transition section closer to the proximal end than the distal end. See figures 1-3.

Claims 1-2, 5-6,9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Otto (USPN 422,436).

Otto discloses a hub an elongated needle having a first inner diameter **E** larger than a second inner diameter **d**, a transition section closer to the proximal end than the distal end **a**. See figure 1.

Claims 1-2, 5-6,9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Powles et al. (USPN 5,902,279).

Powles et al. disclose a hub **21**, an elongated needle **12** having a first inner diameter larger 17 than a second inner diameter 16, a transition section therebetween and closer to the proximal end than the distal end. See figures 1.
